

# CZ 457

## CONTINUING THEIR 75TH ANNIVERSARY CELEBRATION, **TIMNEY ANNOUNCES NEXT LINE OF BOLT GUN TRIGGERS**

Timney Triggers, the oldest and largest trigger manufacturer in the world and the leader in the aftermarket trigger category, announced today its latest replacement trigger for a classic American-style rimfire rifle – the CZ 457.

Timney's customers have been asking for a dedicated CZ Model 457 rimfire trigger for hunting and competition shooting. They asked, Timney delivered.

For the discriminating shooter demanding the utmost

performance from their trigger, our CZ 457 is designed to be robust, user-friendly, adjustable, yet delicate enough to be set with a pull weight as low as 10 ounces up to 2 pounds. Every component of this trigger is

machined using state-of-the-art technology - no skimping with metal injection molding or old-school parts.

The trigger's sear and trigger shoe are precision-machined, heat treated to 56 Rockwell with a black oxide trigger coating and an NP-3 plated sear for maximum lubricity and a lifetime of reliable performance. The CZ 457 trigger is backed by the legendary Timney No Hassle, Lifetime Warranty.

The trigger is available with a curved trigger shoe with a retail price of \$174.99.

The secret to becoming more accurate with your rifle? It all starts with an amazing trigger and this trigger, is truly amazing. The new CZ 457 is Timney's latest overnight success – 75 years in the making. 🇺🇸
